

Avant Insurance Managers' risk management and finance experts ensure that clients reduce their risk exposure through innovative and cost-effective solutions, such as alternative risk transfer (ART). Expected losses from clients' documented recurring events and theoretical exposures (excluding those catastrophic in nature) are two of a number of tools that are utilized to examine the feasibility of an ART solution. Avant incorporates the reinsurance markets, innovative use of capital, and specialized insurance vehicles to address complex risk problems.

As a risk management specialist, Avant Insurance Managers partners with our clients in identifying their particular goals and desired outcomes to create a program that meets the needs of our clients, rather than our clients working around underwriters. Our clients have access to our risk management teams to identify non-mainstream exposures that may exist and to find win-win solutions, unlike take-it-or-leave-it policies.

Our goal is to establish long-term relationships with our clients that will carry on year after year by offering them the most complete and cost-effective solutions. Avant's responsiveness, accountability, and commitment are the foundation of the Avant Insurance Managements' family. *Let the professionals at Avant work closely with you to design the right program to fit your desire for success.*

ALTERNATIVE RISK TRANSFER

“The practice of alternative risk transfer is based on the concept that the risk cost of insurance should be considerably reduced, which, in turn, is based on the insureds' willingness to absorb expected losses and coverages.” - Jeff Post, CEO
